

Q600 Band Cutting Machine

Purpose and Features:

Q600 is suitable for cutting various kinds of rubber-products, plastic products, ect. Such as rubble string, rubber ring and tight pad and so on.

This machine is characteristic of very simple structure and easy to handle. Because of applying the Flywheel structure, reducing the consumption of energy and having a high cut speed, so can reach a high productivity. The cutting surface is smooth and has a even width. It can also be adjusted according to your requirement.

Q600 use a alloy steel cutter, which can provide a ideal cutting effect and for durable usage.

Q600 can be used for single part cutting and multi-part cutting. In operation you can adjust the pressure at the both ends of the rolling bar. to keep the bar parallel to drive bar. It is the even gap between the two bar that prevent defection of cut material, especially for a even width requirement in multi-part.

Technical Parameters:

- ✧ Cutter width: 600mm
- ✧ Moving distance: 40mm
- ✧ Max actual work width: 560mm
- ✧ Cutting width: 1mm-150mm
- ✧ Max cutting thickness: 15mm
- ✧ Main motor power: 1.5KW
- ✧ Axis speed: 104rpm
- ✧ Dimension: 900*600*1380mm
- ✧ Weight: 900Kg
